

KRAEMER
MINING

SPARE PARTS

FOR THE REALLY BIG ONES

LIEBHERR | KOMATSU

HITACHI | TEREX/O&K

COMPETENCE AND EXPERIENCE

For more than 50 years, Kraemer has been operating as building machinery professional. In 2017, Kraemer Mining GmbH was founded and has specialized in the sale of spare parts for mining equipment to meet the special requirements within the mining industry ever since. In the course of the new establishment, the company „Quality Mining Parts“ from Coalville, Great Britain, was taken over and integrated in Kraemer Mining GmbH.

MINING EQUIPMENT WORLD WIDE, SERVICE MADE IN GERMANY

Kraemer Mining provides you with all spare and wear parts which you need for your O&K/TEREX/Bucyrus, Caterpillar, Komatsu, Liebherr and Hitachi mining equipment!

No matter whether you are mining or moving raw materials in a mine, we have the matching parts and components at hand so that everything runs smoothly and long downtimes are reliably avoided! Avoid damage due to ignoring wear - by making the timing right! Planned preventive overhaul and repair, exchange and replacement – we are your reliable partner!

The team of Kraemer Mining GmbH effectively combines the expertise of QMP and the more than 50 years of experience within the Kraemer Group. As regional dealer for construction machinery and international spare part supplier, Kraemer has acquired sound expert know-how. Kraemer Mining GmbH profits from this expert parts knowledge and the logistical know-how of the spare part specialist!

We ship your spare & wear parts from our logistics center at the company headquarters in Rheda-Wiedenbrück and in this way guarantee their fast, reliable and cost-saving supply! Worldwide!

REPAIR WORKSHOP

MANY PARTS - ONE PARTNER

We know your machines! Inside out. Trust in our expertise and expert knowledge, we know what makes your mining equipment work!

- ▶ Undercarriage parts
- ▶ Gear parts
- ▶ Hydraulic parts
- ▶ Wear parts
- ▶ Electric parts
- ▶ Lubrication system
- ▶ Coupling
- ▶ Cabin

OUR PARTNERS

QUALITY, DURABILITY, TECHNICAL PERFECTION!

We impose high standards upon our suppliers enabling us to provide you with the best products with a clear conscience! Our partners have many years of experience and dispose of the appropriate know-how to supply your mining machines with spare and wear parts.

Epiroc, headquartered in Stockholm, Sweden, is a global company that manufactures machinery and equipment for mining and infrastructure. Founded in 2018 after the spin-off from Atlas Copco, Epiroc offers drilling rigs, loading and transport machines, rock drilling tools, ventilation systems as well as automation and digitalisation software. The company places great emphasis on sustainability and innovation and operates in over 150 countries with more than 14,000 employees worldwide.

Epiroc offers a wide range of products and services, including

- ▶ Drilling equipment
- ▶ Loading and transport machines
- ▶ Rock drilling tools
- ▶ Ventilation systems
- ▶ Automation and digitalisation software

ZF is an internationally leading technology corporation specialized in drive and chassis technology as well as in active and passive safety technology. The company is represented in almost 40 countries with a total of 137,000 employees working at around 230 locations. In 2016, ZF generated a turnover of 35.2 billion Euros.

To remain successful in the future with innovative products, ZF invests approximately 6 percent of the turnover in research and development every year. ZF ranks among the largest automotive suppliers worldwide.

- ▶ Axles
- ▶ Transmissions
- ▶ Steerings
- ▶ Undercarriage drives

Donaldson is a global leader in filtration systems. Since 1915, Donaldson has served customers in the industrial engine and diesel engine market, including plant air purification, compressed air and gas purification, fume and dust removal, power supply, data media filtration, off-road machinery and trucks.

We have been distributing the products of this premium manufacturer since 2017.

In 2002, the HELLA Mining Centre of Excellence was established in Australia to design, develop and manufacture lighting especially for the mining industry.

HELLA uses the expertise and special know-how in the fields of research, engineering and logistics to produce products of world class standards which may be utilized for all applications all over the world.

- ▶ Lighting
- ▶ Sensor systems
- ▶ Warning devices
- ▶ Warning signalling devices

As a global partner, Bosch Rexroth supports the worldwide machine and plant engineering industry with superb performances and unique industry expertise. More than 29,500 employees all over the world are constantly working on tailor-made, safe and resource-saving solutions. Innovations from Bosch Rexroth stand for multidimensional improvements for machine manufacturers and users.

- ▶ Hydraulic pumps
- ▶ Hydraulic motors
- ▶ Hydraulic control blocks
- ▶ Joysticks
- ▶ Part-turn gearboxes
- ▶ Gearboxes
- ▶ Valves

O&K Antriebstechnik, part of the Bonfiglioli Group, is one of the worldwide leading manufacturers of planetary gears producing and selling their comprehensive range of axle drives, swivel drives and knife drives for mobile units as well as winch drives, moving walk drives and escalator drives. O&K Antriebstechnik is also able to provide the largest gears which have ever been produced worldwide and adapt them to the biggest mining shovels and crawler cranes. The company philosophy focuses on high technological standards in design & development, manufacture and quality assurance which guarantees the highest degree of performance, efficiency and reliability available on today's market.

- ▶ Part-turn gearboxes
- ▶ Gearboxes

Carraro After Sales & Spare Parts is the competence center of the Carraro corporate group granting absolute reliability of the Carraro products. More than 60,000 codes, parts of drive systems (axles and drives) and special tractors (light agricultural machines for use in orchards and vineyards) with up to 100 hp used by over 100 manufacturers are managed in Carraro's own After Sales & Spare Part warehouses.

- ▶ Part-turn gearboxes
- ▶ Axles
- ▶ Gearboxes

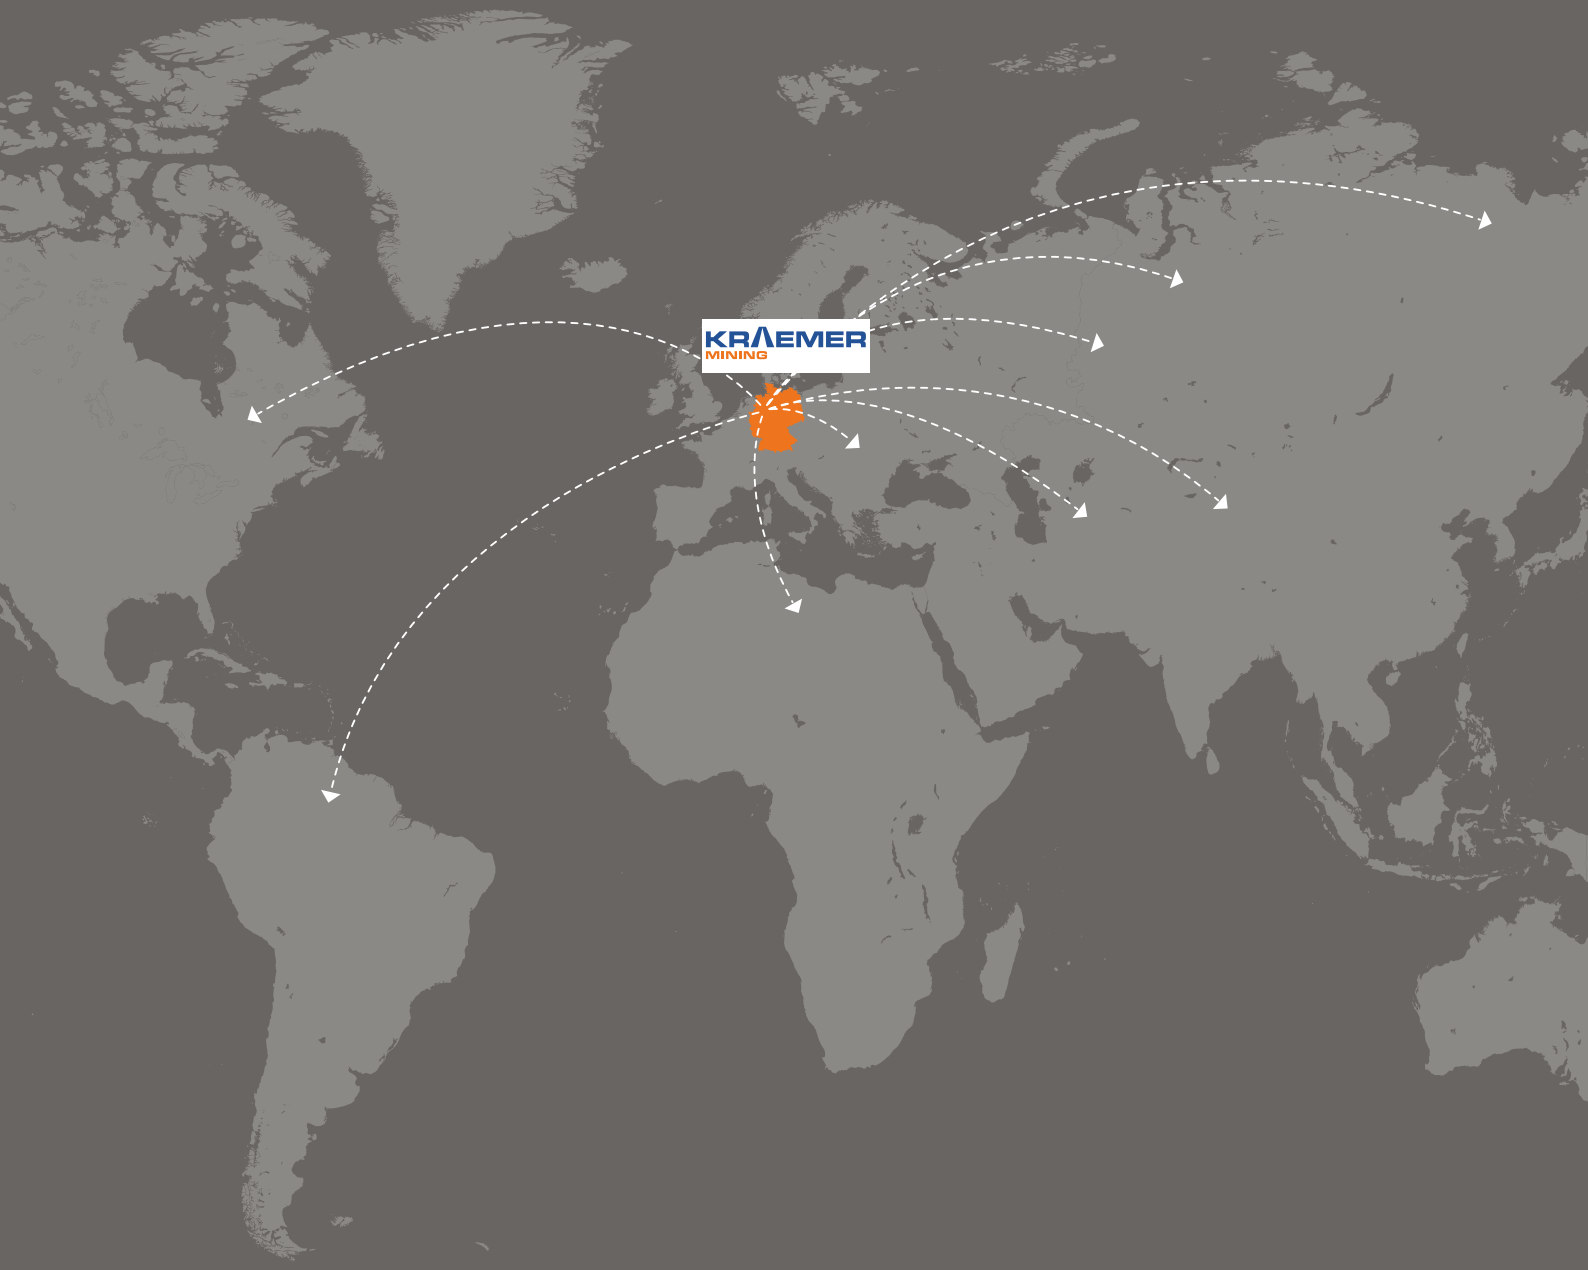

OUR LOGISTICS

WE OPERATE WORLDWIDE

Both in procurement and shipment. Wherever you are, wherever your machines are located – our parts will arrive at the site. Our employees in logistics are experts in the fields of shipment, customs clearance and packaging and will ensure that the goods you ordered will arrive in the right quantity, in the right condition, at the right place and at the right time!

THE FACTS

- ▶ 3.500 sqm warehouse with 16,000 sqm of storage area
- ▶ 22.000 spare parts always in stock
- ▶ Cutting-edge logistics and warehouse technology
- ▶ Daily shipment of goods
- ▶ Express delivery
- ▶ Shipment to 60 countries!

OUR LOGISTICS PARTNERS FOR WORLDWIDE SHIPMENT

The shipment of spare parts for mining equipment often poses a challenge simply in terms of size. In many cases, the operational areas are well hidden and located in remote areas far away from regular routes. BUT - our logistics partners will get the job done! Kraemer Mining exclusively cooperates with logistics companies which guarantee that our spare and wear parts will arrive at your site in the right time frame and in perfect condition! Our logistics partners for shipment in Germany and worldwide:

TEETH AND ADAPTERS

DESIGNED FOR TOUGH WORK WHERE RELIABILITY COUNTS

Better penetration, less stress on the machine and a mechanical lock that is safe and easy to mount and dismount. ProClaws offers a wide variety of benefits as well as areas of usage.

LOWER MAINTENANCE COSTS AND MAXIMUM OPERATION TIME

C-REX is a high performing system solution that delivers significantly lower operating costs. To achieve this, we have maximized the length of the teeth, proportion of wear material and reinforced the adapters.

LIGHTER TEETH – THAT SAVES TIME AND MONEY

To be a lightweight might seem like a negative, but in the dredging industry, it is not. With a unique design that makes the teeth lighter without affecting the wear life, T-System wear parts will not only be safer to handle on board of the machine, it will also deliver great results. The design of the T-System makes the cutter head "free cutting" which increases the lifetime of the adapters.

combi wear parts
move the earth

SLEWING RINGS

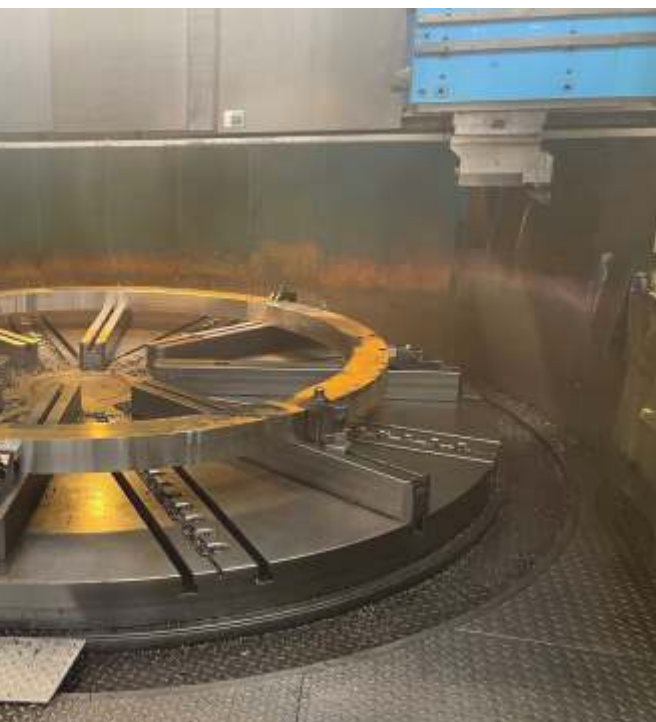

MAXIMUM OPERATION TIME

Optimized power transmission with a simple and quick connection between adjacent machine components.

Standard and customized slewing bearings in various designs, with outside diameters to 4.5 m to meet the demands of particular applications.
